

# **USER GUIDE**

The Efficient Traffic Rerouting and Agency Coordination (ETRAC) is a web mapping application that provides a locational querying service for the official detour plans for District 3 Interstates and Bridges.

The application was created in 2019 utilizing the ESRI ArcGIS JavaScript API 4.x and ArcGIS Online for custom hosted feature layers. The application works best in Firefox and Chrome.

For more information about this application, please contact

**Kenny Shiver** 

District 3 Arterial Management Specialist

Florida Department of Transportation

850-330-1589

Kenneth.Shiver@dot.state.fl.us

**Home Button** — Returns map view to District

**Zoom in/out** — Zooms map in or out

**Search Button** — Search by address

**Basemaps Button** — Allows user to select from a variety of basemaps

**Legend Button** — Displays visible layers on the map

Map Layers Button — Turns on/off map Layers

Hover over roadway to see sections available.

Click Roadway to initiate detour route querying.

Click on the direction of the obstruction.

Where applicable, choose between detour options.

Map will zoom to and display detour route, direction of traffic flow, traffic devices on detour, and any applicable warnings.

Click on detour to reveal detour plan link.

Detour plan will open in new browser tab.
